BIOGRAPHY

Gabriel Hakim has worked within many sectors of the dairy industry. He is well known throughout the Australian dairy industry and has an intimate understanding of its needs and workings; from the grass roots dairy farmer through to the Government and commercial sectors. Trained as an agricultural scientist, he began his career as a scientist researching mastitis almost 20 years ago.

He then began training farmers, students, veterinarians and milk harvesting technicians in areas such as mastitis control, milk quality, dairy hygiene, refrigeration, milking machine performance and their inter-relationships. Gabriel was the National Aftermarket and Service Manager for DeLaval Australia and for 8 years owned and managed a milking machine dealership (Dairy Equipment Specialists). He had key involvement in the invention, development and commercialisation of the Yard Blaster yard wash system.
